Director, Global Supply Chain & Technical Operations

A unique "full-stack" operations leader who leverages **a decade of foundational semiconductor engineering experience** to solve complex global supply chain and business integration challenges. Proven ability to translate deep technical knowledge from silicon design and fabrication into strategic operational excellence—from **leading supply chain teams at AMD** to orchestrating **post-acquisition integrations at HID Global**. Now, as a **Senior Principal at Infosys**, architects AI-driven supply chain transformations, offering a rare blend of technical credibility and strategic business acumen.

Career Highlights: From Engineering to Strategy

- **Strategic Integration:** Co-developed a novel methodology at HID Global to integrate post-acquisition teams, processes, and systems, delivering annual **cost savings exceeding $300K**.
- **Supply Chain Innovation:** Led a cross-functional project at AMD to develop a tool that delivered engineering projections directly to supply planning, **reducing product planner workload by 40%**.
- **Engineering Efficiency:** Authored analysis scripts at Freescale Semiconductor that enabled the product engineering team to analyze initial silicon run data **85% more quickly** (from one week to less than one day).

Professional Experience

Infosys Consulting | Houston, TX **Senior Principal, Semiconductor Vertical** | 2023 – Present

- Architects and leads supply chain transformation projects for global semiconductor clients, redesigning processes and implementing AI-driven best practices to enhance operational agility.

Genpact | Austin, TX **Business Analyst, Supply Chain** | 2022 – 2023

- Designed and executed a comprehensive business process overhaul to facilitate a smooth transition to Kinaxis for supply planning, significantly improving forecasting accuracy and inventory management.

HID Global | Austin, TX **Director, Global Integration & Business Process Engineering** | 2018 – 2022

- Directed strategic planning for operations and manufacturing to scale a regional brand globally, ensuring operational excellence across all international regions.
- Orchestrated the seamless integration of diverse global business units post-acquisition.

Advanced Micro Devices (AMD) | Austin, TX **Senior Manager, Supply Chain & Cost Operations** | 2010 – 2018

- Managed a global team of supply planners, overseeing supply commitments and inventory targets across all business units while developing capacity requirements for S&OP budget planning.
- Drove cost reduction initiatives for the Semi-Custom Business Unit and co-developed the TSMC 7nm cost model to improve financial forecasting for future products.

Independent Consultant | Austin, TX **Business Intelligence Consultant** | 2007 – 2010

- Evaluated customer service protocols and operational workflows for diverse businesses.
- Performed root cause analysis on service delivery gaps and provided data-driven recommendations to improve customer experience and operational efficiency.

Early Engineering Career | Freescale Semiconductor & Advanced Micro Devices (AMD) **Product Development Engineer** | 1997 – 2007

- Developed and optimized complex silicon designs, leading projects from fabrication and assembly through yield improvement and customer return analysis.

Education & Certifications

- **MBA (in progress - 2027)** | Illinois Institute of Technology
- **Micromasters, Supply Chain Mgmt** | Massachusetts Institute of Technology (MITx)
- **Master of Science, Electrical Engineering** | National Technological University
- **Bachelor of Science, Electrical Engineering** | The University of Texas at San Antonio
- **Google Project Management Professional Certificate** | Google x Coursera
- **Business Foundations** | The Wharton School
- **AI Applications for Growth** | Kellogg Executive Education
- **Infosys Leadership Program** | Stanford GSB Executive Education
